(Estd. By Government of Maharashtra)

Dnyangangotri, Near Gangapur Dam, Govardhan, Nashik-422 222

Home Assignment

Academic Year - 2025 - 26

Name of the Programme & Prog. Code	P131 - B.C.A.(with Credits) - Distance Education - 2016 CGPA - T.Y.B.C.A Semester VI & P131		
Year / Semester	T.Y.B.C.A / Semester VI		
Name of the Course & Course Code	PHP Programming (CMP517)		
Name of the Student	SHAH HEET KETAN		
Premanent Registration Number	2023017000253331		
Regional Centre	Y.C.M.OPEN UNIVERSITY REGIONAL CENTER MUMBAI & 3139A		
Mobile Number	9324875653	E-mail ID	heetshah2809@gmail.com
Name of the Study Centre & Code	SMT. P.D.HINDUJA TRUST'S, INSTITUTE OF MANAGEMENT STUDIES & 31236		
Date of Submission	04-05-2026	No of Pages	7

General Instructions

1	Home assignment is useful for self-analysis of your preparation of the final examination and progress
2	Read all the questions and their marks in the home assignment carefully understand the Definitions and concepts properly
3	Read carefully the text, syllabus and summary related to home assignment.
4	Do not copy the points, matter from the text while writing home assignment mentions your one point /opinions whenever necessary
5	Your answer should include how you would apply the knowledge in real life situations
6	Use A4 size lined papers for writing home assignment by taking printout from this file only
7	Write each new answer on a different page.
8	Printed or typed answers are not allowed
9	The marks of Home assignment and corrective instructions will be sent after checking home assignment
10	Present the Home Assignment by following the instructions and rules. Read carefully all the instructions and rules before any correspondence or communication with the university
11	For the programs under NEP 2020 Pattern each theory course of 4 credits its carry 30 marks, there are Two Home Assignments: i) Home Assignment 01 (HA01) is of Twenty marks consisting of 2 Short Answer Questions carrying 5 marks each and 1 Long Answer Question of 10 marks. ii) Home Assignment 02 (HA02) is of Ten marks consisting of total 10 Objective Type Questions (MCQ) carrying 1 mark each.
12	For each theory course of 2 credits, there is Only One Home Assignment of Fifteen Marks consisting of 1 Short Answer Question of 5 marks and 1 Long Answer Question of 10 marks.
13	Student have to write the Home assignment 02 (MCQ) on separate page. Home Assignment 02 also to be uploaded along with Home assignment 01.

Q.NO. 1 : Write a short note on cookies . List the functions for handling cookies .

Ans Cookies is a small text file that a server sends to a user's web browser . The browser stores this file locally on the user's computer and sends it back to the server with every subsequent request . Cookies are primarily used for:

- Session Management : Keeping users logged in as they navigate pages
- Personalization : Remembering user preferences like themes or language.
- Tracking : Monitoring user behaviour for analytics or advertising

* Functions for Handling Cookies in PHP :

- i setcookie () : The primary function used to create or update a cookie

Example : `setcookie ("user", "Jhon", time () + 3600);`

- ii \$ _COOKIE : A superglobal array used to retrieve a cookie value

Example - `echo $_COOKIE ['user'];`

Q.NO. 2 : Explain Model view controller structure in PHP .

Ans Model View Controller (MVC) is a software design pattern that separates an application into three main logical components to make code more organized and maintainable.

- Model : This is the data layer. It manages the database logic, handles data validation & responds to requests from the Controller to update or retrieve information.

- View : This is the presentation layer. It consists of the HTML, CSS & UI elements that the user sees. It displays the data provided by the Model.

- Controller : This is the brain or middleman. It receives the user's input, via the view, processes it (using the Model) & tells the view what to display next.

Q.NO. 3: Define inheritance? Explain the types of inheritance while with suitable examples.

Ans Inheritance is a core principle of (OOP) where a child class (subclass) inherits the properties and methods of a parent class (superclass). It promotes code reusability.

* Types of Inheritance in PHP :-

i Single Inheritance - A child inherits from class from only one parent class.

• Example : Class car inherits (extends)

class vehicle

ii Multilevel Inheritance - A class inherits from a child class, creating a chain.

• Example : Class C inherits from

Class B which inherits from

Class A

iii Hierarchical Inheritance - Multiple child classes inherit from a single parent class.

Q.NO. : 4 What are the steps for installing Laravel framework?

Ans. Laravel is a PHP framework that uses Composer for dependency management. Here are the standard steps :-

i. Install PHP and Server Environment : Ensure you have PHP installed (usually via XAMPP or WAMP) along with extensions like OpenSSL and BCMath.

ii. Install Composer : Download and install Composer from getcomposer.org. This is the tool that handles Laravel's packages.

iii. Install Laravel via Composer : Open your terminal or command prompt & run the following command :

```
composer global require laravel/installer
```

iv. Create a New Project : Navigate to your web directory (like htdocs) & run :

```
laravel new my-project
```

v. Run the Application : Move into the project folder (cd my-project) and start the local development server :
